Note : TSH levels are subject to circadian variation, reaching peak levels between 2 – 4 am and at a minimum between 6 – 10 pm. The variation is of the order of 50% - 206 %, hence time of the day has influence on the measured serum TSH concentrations.

TSH assay is strandized to the 3rd generation for human TSH.

The Cyclical variations may be quite large; therefore the timing of specimen collection must be strictly controlled.

Advise : Kindly do Thyroid Profile/TSH in morning hours only.
